Hi Steven,

Attached is the clothi/thia PID w/ Dana's comments.

Cheers,

Matt

Matt,

First, I want to say that it is a remarkable achievement that you've gotten up to speed so quickly with the neonics, readily adapted to (and identified!) curveballs encountered along the way, and brought the clothi/thia document to this stage.

You've done a great job rolling in my comments from imi into your document, so I found that the areas that include more comments from my review are in the RTC and human health section. Edit-wise, you'll note I made some significant reformatting/editing changes to the human health section, mainly to get our point across more quickly/easily to the reader.

The main issue we need to resolve is **Deliberative Process / Ex. 5**
let's definitely touch base early on Monday. **There are a few items that will need coordination with Steven, which I've flagged in the document** **Deliberative Process / Ex. 5**
Deliberative Process / Ex. 5

While these edits, and any questions I raised should be addressed first, provided there is time for it given our abbreviated timeframe, it would be good to go back to clean up inconsistencies in tense, abbreviations, etc. That is the lowest on the priority list, so just let me know where you end up on that by 3pm on Monday. I would like to turn these around for Billy and Elissa's review so it is available to them on Monday late afternoon. We can touch base more on timing on Monday.

Many thanks for all your work on this,
Dana
